

Program

Session 1 : EVAR

Tuesday, September 2 8:30 — 9:30 Oral Session Venue(Room408+409)

Chairs : Takao Ohki (*The Jikei University School of Medicine*)
 Juno Deguchi (*Saitama Medical Center*)
 Thomas Grube (*Clinic for Thoracic, Vascular and Endovascular Surgery, Chemnitz, gGmbH*)

- S1-01 Balancing Risks and Clinical Outcomes of Endovascular Aneurysm Repair in Nonagenarians
 Kayoko Natsume (*Seirei Mikatahara General Hospital*)
- S1-02 IVL – Intravascular Lithotripsy – a new kid on the block or an old acquaintance
 Introduction to the basic principles and practical application in the treatment of the coral reef aorta
 Thomas Grube (*Clinic for Thoracic, Vascular and Endovascular Surgery, Chemnitz, gGmbH*)
- S1-03 Impacts of proximal neck morphology and aortic branches coil embolization on late open conversion and rupture after abdominal endovascular aortic repair
 Akitoshi Takazawa (*Department of Cardiovascular Surgery, Showa Medical University Hospital*)
- S1-04 Intra-aneurysm management for type 1a endoleak during EVAR
 Mika Yamamoto (*Department of Cardiovascular Surgery, Teine Keijinkai Hospital*)
- S1-05 The KILT Technique for Preventing Type II Endoleak: A Retrospective Analysis of Diameter Change and Endoleak Incidence.
 Suguru Tatsuki (*Department of Cardiovascular Surgery, Sapporo Cardio Vascular Clinic*)
- S1-06 EVAR for the AAA patients with hostile proximal neck with severely angulated proximal neck
 -Early and long term outcomes using the Aorfix™
 Hideaki Maeda (*Ukima central Hospital Cardiovascular center*)

Session 2 : PAD1

Tuesday, September 2 9:30 — 10:30 Oral Session Venue(Room408+409)

Chairs : Hiroyoshi Komai (*Kansai Medical University Medical Center*)
 Katsuyuki Hoshina (*Department of Vascular Surgery, The University of Tokyo*)
 Gabor Gabel (*EVK Herne*)

- S2-01 Clinical Outcomes of VIABAHN VBX Stent-Graft in Emergency Arterial Bleeding: A Retrospective Single-Center Study
 Tomoharu Yamanaka (*Department of Diagnostic and Interventional Radiology, Kobe University Hospital*)
- S2-02 Characteristics and surgical outcomes of the renal artery aneurysms from a single institute in Japan
 Yu Tadokoro (*Department of Vascular Surgery, the University of Tokyo*)
- S2-03 Increased risk of peripheral arterial ischemic events in patients admitted with COVID-19-pneumonia – Results of a national comparative study
 Gabor Gabel (*EVK Herne*)
- S2-04 Outcomes of Rheocarna Therapy for Chronic Limb-Threatening Ischemia: A Multicentre Study
 Tsunehiro Shintani (*Department of Vascular Surgery, Shizuoka Red Cross Hospital*)

- S2-05 Flexible Ureteroscope-Assisted Remote Endarterectomy for TASC II D Lower Extremity arterial occlusive disease
Jiehua Qiu *(The second affiliated hospital of Nanchang University (Now studying in NCVS of Japanese))*
- S2-06 The Role of Vascular Surgeons in the Era of "EVT-First".
Yasuka Nakanishi *(Osaka Keisatsu Hospital, Aortic and Vascular Center)*

Session 3 : Venous Disorders

Tuesday, September 2 10:35 — 11:35 Oral Session Venue(Room408+409)

- Chairs : Nobuyoshi Azuma *(Department of Vascular Surgery, Asahikawa Medical University)*
Masayoshi Okada *(Kobe University of Health)*
Werner Lang *(Professor, Department of Vascular Surgery, University Hospital Erlangen International Honorary Member, Japanese Society for Vascular Surgery)*
Thomas Noppeney *(Professor, Head section phlebology, Dept. of vascular and endovascular surgery, University hospital Regensburg)*
- S3-01 15-Year Long-Term Results After Radiofrequency Ablation in Comparison to Ligation of the Sapheno-Femoral Junction and Stripping
Thomas Noppeney *(Professor, Head section phlebology, Dept. of vascular and endovascular surgery, University hospital Regensburg)*
- S3-02 Recurrent Varicose Veins and Treatment Algorithm
Kerstin S. Schick *(Gefässmedizin München Süd, Munich, Germany)*
- S3-03 Technique and long-term results of arteriovenous fistulas for hemodialysis in pediatric patients
Werner Lang *(Professor, Department of Vascular Surgery, University Hospital Erlangen International Honorary Member, Japanese Society for Vascular Surgery)*
- S3-04 Long-term outcomes of arteriovenous snuffbox fistulas for hemodialysis
Matthias Wunsch *(Department of Vascular Surgery, Evangelisches Krankenhaus Koenigin Elisabeth Herzberge)*
- S3-05 Gender differences in carotid reconstruction - fact or myth?
Martin Storck *(Professor, Director of Dept. Vascular Surgery at the Klinikum Karlsruhe 2024 Congress president of the German Vascular Surgical Society 40th anniversary meeting)*
- S3-06 Toward improving compliance with compression therapy for the treatment of venous stasis ulcers
Kanako Takai *(Department of Cardiovascular Surgery, Higashiosaka City Medical Center)*
- S3-07 Assessments of surgical treatment for the patients with superior vena cava (SVC) syndrome
Masayoshi Okada *(Kobe University of Health)*

Luncheon Seminar 1

Co-Sponsored by Johnson & Johnson

Tuesday, September 2 11:50 — 12:40 Oral Session Venue(Room408+409)

- Chairs : Taichi Sakaguchi *(Department of Cardiovascular Surgery, Hyogo Medical University)*
- LS1-1 Zero Bleeding, Zero Infection: Practical Tips for Hemostasis
Soichiro Henmi *(Department of Cardiovascular Surgery, Kobe University)*

- LS1-2 My experience and strategy of aortic surgery
Arudo Hiraoka (*The Sakakibara Heart Institute of Okayama*)

Session 4 : Infectious disease and others

Tuesday, September 2 12:50 – 13:50 Oral Session Venue(Room408+409)

- Chairs : Hitosh Matsuda (*National Cerebral and Cardiovascular Center*)
Shinji Miyamoto (*Department of Cardiovascular Surgery, Oita University*)
Cornelia Deckwerth (*Dept. Hospital Hygiene, Helios Hospital Group Southwest Germany*)

- S4-01 Special lecture Surgical management of aorta-related infections
Yutaka Okita (*Takatsuki General Hospital*)
- S4-02 Special lecture Changes in transmittable infections due to climate changes in Germany
Cornelia Deckwerth (*Dept. Hospital Hygiene, Helios Hospital Group Southwest Germany*)
- S4-03 Application of continuous local antibiotic perfusion for mediastinitis after cardiovascular surgeries
Koki Yokawa (*Department of Cardiovascular Surgery, Kakogawa Central City Hospital*)
- S4-04 Antero-lateral thoracotomy with partial sternotomy for thoracic aortic infection
Katsuhiko Yamanaka (*Kobe University Graduate School of Medicine, Cardiovascular Surgery*)
- S4-05 Our treatment outcomes for Chronic Limb-Threatening Ischemia on Hemodialysis
Takuo Nomura (*Juzen memorial hospital vascular surgery*)
- S4-06 Our approach to tumors invading the inferior vena cava
Norifumi Kaigakura (*Department of surgery, Keio University School of Medicine*)
- S4-07 Avoiding vascular complications of veno-arterial extracorporeal membrane oxygenation and microaxial pumps by subclavian access
Moritz Benjamin Immohr (*Department of Thoracic and Cardiovascular Surgery, West German Heart and Vascular Center, University Hospital Essen, University of Duisburg-Essen*)

Afternoon Seminar 1 :

Thoraflex Hybrid simplifies acute aortic dissection surgery

– Clinical experience from Japanese experts –

Co-Sponsored by TERUMO CORPORATION

Tuesday, September 2 13:50 – 14:40 Oral Session Venue(Room408+409)

- Chairs : Kenji Okada (*Kobe University Graduate School of Medicine, Cardiovascular Surgery*)

- AS1-1 Yosuke Inoue (*National Cerebral and Cardiovascular Center, Vascular Surgery*)
- AS1-2 Tatsuichiro Seto (*Shinshu University School of Medicine, Cardiovascular Surgery*)

Poster Session 1 :

Tuesday, September 2 14:45 — 15:15 Poster Session Venue(Room407)

Chairs : Masato Yamaguchi (*Department of Diagnostic and Interventional Radiology, Kobe University Hospital*)
 Matthias Wunsch (*Department of Vascular Surgery, Evangelisches Krankenhaus Koenigin Elisabeth Herzberge*)

- P1-1 Endovascular Aneurysm Repair Using the ALTO Device in a Patient with Cannulation Failure Due to Contralateral Limb Obstruction: A Case Report and Literature Review
 Riki Sumiyoshi (*Yokohama City Minato Red-Cross Hospital*)
- P1-2 A case of fenestrated EVAR with physician modified endovascular graft for type IV thoracoabdominal aortic aneurysm
 Atsushi Kitagawa (*Department of Cardiovascular Surgery, Ako Central Hospital*)
- P1-3 Association between poor oral health and clinical outcomes after endovascular abdominal aortic aneurysm repair
 Yohei Kawai (*Aichi Medical University*)
- P1-4 Acute Limb Ischemia Due to Distal Embolism from an Occluded Axillo-bifemoral Bypass Graft: A Case Report
 Hidekazu Nakai (*Kita-harima Medical Center, Department of Cardiovascular Surgery*)
- P1-5 In-situ repair for brachiocephalic artery aneurysm in a patient with Loeys-Dietz syndrome
 Tatsuya Ozaki (*Department of Cardiovascular Surgery, National Cerebral and Cardiovascular Center*)

Poster Session 2 :

Tuesday, September 2 14:45 — 15:15 Poster Session Venue(Room407)

Chairs : Tetsuro Uchida (*Yamagata University Faculty of Medicine*)
 Brian Haney (*Department of Vascular Surgery, University Hospital Erlangen*)

- P2-1 Usefulness of reversed cannulation method and open anastomosis at Zone 4 in reducing embolic risk in total arch replacement for Shaggy aorta
 Minami Yamashita (*Department of Thoracic and Cardiovascular Surgery, Hirosaki University School of Medicine*)
- P2-2 Thoracoabdominal Aortic Replacement via Median Laparotomy in a Patient with Prior Aortic Surgery for Thoracic and Abdominal Aortic Aneurysms
 Shuto Watanabe (*Department of Thoracic and Cardiovascular Surgery, Hirosaki University School of Medicine*)
- P2-3 Prosthetic graft replacement for right axillary artery aneurysm in an elderly patient with Marfan syndrome.
 Kazuki Miyatani (*National Cerebral and Cardiovascular Center*)
- P2-4 A case of surgical resection of inferior vena cava myxoma using deep hypothermic circulatory arrest
 Masato Hayama (*Department of Cardiovascular Surgery, Fukuoka University Hospital*)

- P2-5 Treatment of acute type A dissection with cerebral perfusion abnormalities with preoperative carotid stents.
Atsunori Kono (*Hyogo Prefectural Harima-Himeji General Medical Central*)

Poster Session 3 :

Tuesday, September 2 14:45 — 15:15 Poster Session Venue(Room407)

- Chairs : Yoshiko Watanabe (*Kawasaki Medical School*)
Moritz Benjamin Immohr (*Department of Thoracic and Cardiovascular Surgery, West German Heart and Vascular Center, University Hospital Essen, University of Duisburg-Essen*)
- P3-1 A case of celiacomesenteric trunk aneurysm reconstructed with common iliac artery to common hepatic artery bypass
Kazuyoshi Matsubara (*Department of Vascular Surgery, Saitama Medical Center*)
- P3-2 Prognosis of celiac artery aneurysms
Shinichiro Horii (*Division of Vascular Surgery, Department of Surgery, Japanese Red Cross Ishinomaki Hospital*)
- P3-3 a Rare Deep Femoral Aneurysm in a Very Elderly Patient
Nobuko Yamamoto (*Kansai Medical University Medical Center, Department of Vascular Surgery*)
- P3-4 Hybrid Repair of an Extensive Aortic Arch Aneurysm in Active Takayasu Arteritis Associated with Crohn's Disease: A Case Report
Atsushi Takashima (*Department of Cardiovascular Surgery, National Cerebral and Cardiovascular Center*)
- P3-5 "Long-term Outcomes of Bovine Pericardial Patch (XenoSure®) in Femoral Artery Thromboendarterectomy
Takayuki Uramoto (*Department of Vascular Surgery, Asahikawa Medical University*)

Afternoon Seminar 2

Co-Sponsored by Smith & Nephew K.K.

Tuesday, September 2 15:30 — 16:00 Oral Session Venue(Room408+409)

- Chairs : Toshifumi Kudo (*Division of Vascular Surgery Department of Cardiovascular Surgery / Institute of Science Tokyo*)
- AS2-1 Incisional PICO® (iPICO) may contribute to good wound outcomes after distal bypass procedures
Sohei Matsuura (*Division of Vascular Surgery Department of Vascular Surgery, Fujita Health University*)

Session 5 : Experiment

Tuesday, September 2 16:10 — 17:10 Oral Session Venue(Room408+409)

Chairs : Nobuyoshi Azuma (*Department of Vascular Surgery, Asahikawa Medical University*)
Yoshikatsu Saiki (*Division of Cardiovascular Surgery, Tohoku University Graduate School of Medicine*)

Markus Wagenhäuser (*Professor, Department for Vascular- and Endovascular Surgery, University Hospital Düsseldorf, Heinrich-Heine University Düsseldorf*)

S5-01 Special lecture Endothelial dysfunction drives atherosclerotic plaque macrophage- dependent abdominal aortic aneurysm formation

Taku Emoto (*Division of Cardiovascular Medicine, Department of Internal Medicine, Kobe University Graduate School of Medicine*)

S5-02 Intense Impact of Inflammatory Cells on Pathogenesis of Acute Aortic Dissection

Taishi Inoue (*Division of Cardiovascular Surgery, Kobe University Hospital*)

S5-03 Animal Models for Abdominal Aortic Aneurysm: Tools for Mechanistic and Translational Research

Joscha Mulorz (*Dept. of Vascular and Endovascular Surgery, University Hospital Düsseldorf*)

S5-04 Vascular Ageing: From Molecular Mechanisms to Clinical Manifestations

Markus Wagenhäuser (*Professor, Department for Vascular- and Endovascular Surgery, University Hospital Düsseldorf, Heinrich-Heine University Düsseldorf*)

S5-05 Therapeutic Potential of the Novel Antioxidant Resorcimoline in Ischemia-Reperfusion Injury in Vascular Surgery

Takayuki Kawashima (*Department of Cardiovascular Surgery, Oita University*)

S5-06 Experimental and clinical studies on transmyocardial laser revascularization

Masayoshi Okada (*Kobe University of Health*)

S5-07 Multilayer stent implantation for patients with type B aortic dissection; preliminary report with flow dynamics assessment by diagnostic imaging

Yoshikatsu Saiki (*Tohoku University, Division of Cardiovascular Surgery*)
