On the third day, we will extend our journey from Himeji to see the **Akashi Kaikyō Bridge**, located between Kobe in Hyogo Prefecture and Awaji Island. This bridge is the **second longest suspension bridge in the world**, and its magnificent structure and beautiful scenery attract many tourists.

During this trip, you will visit the **"Bridge Science Museum,"** which showcases the latest technology used during the bridge's construction, as well as the **"Maiko Marine Promenade,"** which features a circular walkway that **risers about 47 meters above sea level** and **extends approximately 317 meters into the Akashi Strait, about 150 meters from the land.**

After the sightseeing, we will return to Himeji and enjoy your final dinner at **Solaniwa Himeji**, a restaurant with a **breathtaking view of Himeji Castle and the surrounding castle town.**
